Dear Hiring Manager,

I am excited to apply for the Staff/Senior Test Engineer or QA position at your company, bringing over 6+ years of experience in the field of both automation and manual.

I have gained extensive experience in developing and implementing automation strategies for various projects throughout my career. I have worked on numerous automation projects, including building test automation frameworks, automating regression testing, and implementing continuous integration and deployment processes. My expertise also includes scripting in Python, Java, C#, and JavaScript, and using various automation tools such as Selenium, Appium, Cypress, playwright etc

In my current role as a Senior Test Engineer, I have successfully automated several manual processes, resulting in significant cost savings and increased productivity. I also played a key role in the successful implementation of the company's continuous integration and deployment pipeline.

Additionally, I am skilled in identifying and resolving issues related to software development, and I have a strong understanding of software testing methodologies. I am a team player with excellent communication skills and work well under pressure.

I am excited to bring my experience and expertise to your company, and I am confident that I can contribute to your team's success. Thank you for considering my application. I look forward to discussing my qualifications in more detail.

Sincerely,  
Muhammad Raheel
